

HOLLYWOOD'S MISSION

Hollywood was established to give back to the community. We use professional products that are environment & people conscious, educate and give careers, and welcome everyone that comes through our doors.

We have monthly specials and include haircuts in all chemical services. This is simply because we understand that everyone needs at least 1 service offered and everyone should be able to afford their necessity.

Our academy is to give careers to all that has the initiative to help themselves. It is proven that if we all have one common goal in mind: success; the more people we can help in life no matter what the "help" may consist of.
